

ABHINAV ANAND

Aspiring AI/ML Engineer | Data Scientist

abhinavanand9996@gmail.com | +91 9153051907 | Jalandhar, Punjab, India

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Second-year B.Tech Computer Science (AI/ML) student at LPU (CGPA: 7.0) with hands-on experience building and deploying end-to-end machine learning and AI applications as an aspiring AI/ML Engineer and Data Scientist. Proficient in Python, Scikit-Learn, and Streamlit, with growing expertise in NLP (spaCy, Sentence Transformers) and applied generative AI (Groq LLM APIs). Comfortable across the stack — FastAPI backends, Supabase/Database data layers, and Pandas/NumPy-driven data pipelines. Seeking an internship as a Machine Learning Engineer or AI/ML Developer to apply ML, data science, and full-stack skills.

EDUCATION

B.Tech — Computer Science (AI/ML)

Aug 2025 – Aug 2029

Lovely Professional University • Punjab, India | CGPA: 7.0

TECHNICAL SKILLS

- **Languages:** Python | **Databases:** Relational & Cloud Databases
- **ML / Data Science:** Scikit-Learn, Pandas, NumPy, Logistic Regression, K-Means Clustering, Random Forest, Feature Engineering
- **NLP / GenAI:** NLP, spaCy, Sentence Transformers, Generative AI, LLM APIs (Groq — Llama 3)
- **Computer Vision:** Face & Voice Recognition
- **Backend & Deployment:** FastAPI, Streamlit, Supabase (Auth & DB)
- **Tools & Platforms:** Git, GitHub, VS Code

PROJECTS

CreditWise — AI Loan Risk Intelligence System

[Live](#) | [GitHub](#)

Python | Scikit-Learn | Logistic Regression | Feature Engineering | Pandas | Streamlit

- Built an end-to-end ML pipeline in **Python** using **Pandas** for data processing and **Scikit-Learn's** Logistic Regression with engineered features, achieving **87.5% classification accuracy** across risk tiers.
- Designed an explainable Low/Medium/High risk-scoring system and deployed it as a real-time **Streamlit** app for interactive scenario testing.

AI-Powered Customer Intelligence System

[Live](#) | [GitHub](#)

Python | Scikit-Learn | K-Means Clustering | Random Forest | Pandas | NumPy | Streamlit

- Developed a customer segmentation and churn-prediction pipeline in **Python** using **K-Means clustering** and a **Random Forest** classifier on **Pandas/NumPy**-processed behavioral data.
- Built and deployed an interactive **Streamlit** dashboard for real-time segment exploration and churn-risk insights.

AI Resume ATS Scorer

[Live](#) | [GitHub](#)

Python | FastAPI | Streamlit | spaCy | Sentence Transformers | Groq LLM API | Supabase | Databases

- Built a full-stack ATS resume-scoring platform in **Python** (**FastAPI** backend, **Streamlit** frontend) comparing resumes to job descriptions via semantic similarity (**Sentence Transformers**) and NLP-based skill extraction (**spaCy**).
- Integrated Groq's Llama 3 **LLM API** for generated improvement suggestions and implemented user auth / analysis-history storage using **Supabase** (**Database**-backed storage), plus automated downloadable PDF reports (WeasyPrint, Jinja2).

AttendPro — AI-Powered Biometric Attendance Platform

[Live](#) | [GitHub](#)

Python | Streamlit | Supabase | Face & Voice Recognition | FastAPI

- Built an AI-powered attendance platform in **Python** using **face and voice recognition** to automate classroom check-ins, with real-time logging to a **Supabase** database.
- Designed session analytics and attendance-trend tracking for teachers, with a student dashboard showing live attendance percentage.

KEY STRENGTHS

- Strong problem-solver with end-to-end product thinking — from raw data and model training to deployed, user-facing applications.
- Fast learner actively upskilling in generative AI and applied NLP.
